

Side Sheet Dimensions Required Anexe Pro 1 straight side.

Please state colour..... Skirt Colour is Grey unless specified.....

A = the ground to the underneath side of the awning cassette

B = The underneath side of the leadrail to the ground when awning is extended and legs are set in middle height position

C = The horizontal size from the vehicle wall to the groove in the underside of the front lead rail profile.

D = The side rafter length. This is the size from the cassette where the drilled holes are at the top to the rear side of the leadrail. We deduct 25mm from this as the cut size of the rafter to allow the sliding pins to locate into the predrilled holes.
